

mattiasbernson

I'm an experienced IT-consultant who have worked within a variety of system development areas. My key competences today are as a Product Owner or Scrum Master (Agile Coach) even though I've worked a lot within Project Management & Process Engineering and also Business & System Analysis.

During my earlier years as an IT-consultant I have worked with both Change Management and IT-Education, where the latter is one area where I really thrive.

Since I've been employed and assigned in Sundsvall, Stockholm and Gothenburg, and worked with international projects with sites in U.S.A, France, India, Poland and Scandinavia, I've gained a broad experience from different IT-cultures.

I always work with a smile on my face and without prestige. When problems arise I tend to solve them in the best way for the designated team/project. I'm very pragmatic and pedagogical, which comes from my work as an IT-Trainer.

In my spare time I like to run, play floorball, golf and swim, preferably in the ocean. I'm also interested in photography and design.

I'd be more than happy to help your team or project to succeed!

Group: Rational Services
Location: Stockholm 2009-2010

HiQ

Group: HiBridge
Location: Stockholm 2007-2009

Volvo Information Technology

Group: Consulting Services
Location: Gothenburg 2004-2007

National Social Insurance Board (RFV Data)

Group: Utbildning-Metod-Stöd
Location: Sundsvall 1999-2004

Telia Operator

Current - 2016

Product Owner

Managing the following portals of Teliasonera: teliaoperator.se, oppenfiber.se, bredbandswebben.se. Acting as a Product Owner for these portals I meet with the business and prioritize the backlog for a development team.

Skanova & IC

2014

Scrum Master

Assigned as a Scrum Master I set up a new team which handled all incoming developments and enhancements for Teliasonera's three Net Business web portals; Skanova, Teliaoperator Business and Teliasonera International Carrier.

Skanova & IC

2013

Product Owner

Managing an outsourced development project for Skanova at Teliasonera. The resources were located in Chennai, India, where they implemented the Skanovas new web portal in Magnolia. The task included a lot of web conferences and daily meetings with different nationalities.

Teliasonera

2012

Project Manager

I worked as a Project Manager for a web migration project where TeliaSonera (in cooperation with Tieto) migrated Skanova's, Telia Operator Business and Teliasonera International Carriers internet portals from a legacy platform to the new (Agora). One part of the project was to set up the new Agora platform (including Magnolia) for these three portals.

Teliasonera

2011

Requirements Mentor & Manager

I was assigned as a mentor for the requirement team in a major development program upgrading the support system "Caesar" for TeliaSonera. Later on my role shifted to manage the requirements and also overlooking the business needs. Part of the assignment was also to enhance the development process (Waterfall & Scrum) regarding both the requirement and test area.

IBM Rational

2009

Process Engineer (Scrum)

I assisted companies and projects as a process engineer (Scrum) and tool expert. When assisting I tried to help them work more efficiently with their development ventures through enhancing their processes. Mainly overlooking the overall process (including the designated tools) and in particular the requirement and project management parts.

SEB

2008

Process Engineer & Trainer

Assigned as a process engineer and trainer, I worked for a major implementation project of SEB's own development process; SEB UP (influenced by RUP) for all of SEB IT. Part of the assignment included project management mentorship and executing one-day courses once a week.

Munters

2007

Quality & Requirements Manager

I worked as a Quality Manager for a project where Munters developed a wireless system through laptops and hand computers for their field technicians. Along the project I also took the role of a Requirements Manager, helping them to clarify what the needs were and how they should design the IT-solution to fulfill those needs.

Volvo 3P

2006

Product Manager

I was assigned as a Product Manager for a small upgrading project for Volvo 3P. Mostly coordinating all concerned parties and their change requests. As the Product Manager I was also responsible for executing the system analysis for all incoming requests.

Volvo IT

2005

Process Manager

I was named Global Manager for Volvo IT's "Configuration, Change & Available Management", which was a new position (role) I helped Volvo IT to establish. The scope was to consolidate the way of working for these areas within the three major regions (USA, France and Sweden) of Volvo IT.
